Professional Summary

Software Engineer with 10+ years of experience building scalable, high-quality web applications at companies like Onehouse, Harness, and Walmart Labs. Proficient in React, TypeScript, JavaScript, and modern frontend tools. Skilled in frontend architecture, testing strategies, component design systems, and mentoring. Adept at collaborating cross-functionally and contributing to backend services using Java.

Technical Skills

Frontend: React.js, Next.js, Redux, JavaScript, TypeScript, SCSS, Material UI, Cypress, Jest, React Testing Library

Backend: Node.js, Java, gRPC, Play Framework

DevOps/Tools: Git, CI/CD, Amplitude, Figma

Database: MongoDB, MySQL

Others: D3.js, Web Accessibility, Performance Optimization

Professional Experience

Onehouse – Software Engineer

Jul 2024 – Present | Bengaluru, India

- Own end-to-end responsibility for frontend engineering — from feature planning and task allocation to hands-on development, quality assurance, alerting, monitoring, and spearheading new engineering initiatives — all driving exceptional user experience and customer satisfaction.
- Led the development of core platform features including Table Services, Compute Clusters, Access Controls, and Groups & Permissions, using React.js, Next.js, TypeScript, and gRPC, contributing directly to the successful onboarding of 5 customers and 7 active POCs.
- Integrated Amplitude for user telemetry to enable data-driven product decisions and usage insights.
- Driving a complete platform redesign by architecting a new design system and shared component library, improving usability and strengthening user trust.

Tech Stack: React.js, Next.js, Redux, TypeScript, JavaScript, Material UI, gRPC, Jest, Cypress

Harness

Staff Software Engineer

Aug 2022 – May 2024 | Bengaluru, India

- Delivered high-impact features supporting deployment to AWS Lambda, AWS SAM, Google Cloud Functions, and Azure Functions, driving adoption of the CD module by 15 new customers — including 7 enterprise accounts.
- Reduced delivery time of complex deployment features from 3+ weeks to under 1 week by addressing technical debt, eliminating inefficient practices (e.g., Jest snapshot tests), and improving testing strategies.
- Led and mentored a team of 4 engineers, overseeing technical planning, task prioritization, PR reviews, and QA — resulting in customer growth from 30 to 75 active CD users.

Tech Stack: React.js, TypeScript, JavaScript, SCSS, Jest, Cypress

Senior Software Engineer

Mar 2021 – Aug 2022 | Bengaluru, India

- Built shared, high-impact CD UI features such as the Git Experience and CD-specific swimlanes (e.g., Serverless AWS Lambda, Amazon ECS) using React, TypeScript, Context API, and comprehensive test coverage with Jest, React Testing Library, and Cypress, directly contributing to 21 new customer onboardings and growing total CD adoption to 50+ customers.
- Promoted to Staff Software Engineer in recognition of sustained engineering excellence, high-quality delivery, and measurable product impact.

Tech Stack: React.js, TypeScript, JavaScript, SCSS, Jest, Cypress

Walmart – *Software Engineer III*

Oct 2019 – Mar 2021 | Bengaluru, India

- Enhanced user experience for the Buy-Together feature and key carousels like “Based on your browsing history” and “People also bought” using React.js, JavaScript, and Redux, resulting in a 30% increase in items added to cart.
- Improved accessibility (A11y), integrated analytics beacons for feature usage tracking, and optimized SEO, contributing to a 25% increase in product page views over six months.

Tech Stack: React.js, Redux, JavaScript, Jest, Cypress, SEO, Accessibility (A11y)

Recrosoft Technologies (Client: Cure.fit) – *Software Engineer*

Oct 2018 – Oct 2019 | Bengaluru, India

- Developed Ramsay, a tool for nutritionists to manage ingredients, dishes, and meals in a centralized database used across the Curefit app, leading to a 20% increase in mobile app users.
- Contributed to CareFit, a doctor-facing app for tracking patient consultation history, enabling a 30% increase in patient throughput by eliminating reliance on physical records.

Tech Stack: React.js, Redux, JavaScript, TypeScript, Node.js, MongoDB

DSquare Solutions – *Software Engineer*

Dec 2015 – Oct 2018 | Bengaluru, India

- Developed an enhanced analytics product delivering business insights and predictions via interactive charts and dashboards, resulting in faster load times, streamlined filtering, and visually appealing visualizations.
- Implemented diverse chart types—including Column, Bar, Line, Area, Dendrogram, and Sunburst—using D3.js, contributing to the successful onboarding of 5 new customers.

Tech Stack: React.js, Redux, JavaScript, D3.js, Java, Play Framework, MySQL

Education

L.D. College of Engineering, Ahmedabad

Bachelor of Engineering (B.E), Information Technology – 2011 – 2015

Certifications

- Oracle Certified Associate, Java SE 7 Programmer
